The authors regret that Figure 2 contained errors in the lines indicating the correlations between the latent factors. First, the correlation between Agency and Anxiety was omitted; a correlation line with a value of 0.34 should have been included. Second, the correlation values for Agency and Disorientation, and for Anxiety and Frustration, were inadvertently interchanged. The correlation between Agency and Disorientation should therefore have been 0.32 rather than 0.72, and the correlation between Anxiety and Frustration should have been 0.72 rather than 0.32. A corrected version of Figure 2 is provided.

The authors would like to apologise for any inconvenience caused.
